Wisconsin's Online Library provides Wisconsin residents with access to online information at BadgerLink.dpi.wi.gov

BadgerLink is a project of the Wisconsin Department of Public Instruction, Division for Libraries and Technology

Funding is provided through the Universal Service Fund and the Institute of Museum and Library Services

MasterFILE Premier

Available via EBSCOhost®

■ Full-text coverage for thousands of general reference publications

Designed specifically for public libraries, this multidisciplinary database provides full text for nearly 1,700 general reference publications, with full-text information dating as far back as 1975.

■ In-depth general interest subject coverage

This database covers virtually every subject area of general interest, including:

- Business
- Health
- Education
- General science
- Multicultural issues
- General reference
- And much more...

■ Full-text reference books, primary source documents, and more...

In addition, *MasterFILE Premier* provides full text for more than 500 reference books and over 81,900 primary source documents, as well as an Image Collection of over 935,000 photos, maps & flags. This database is updated daily via EBSCOhost®.

Science Reference Center™

Fire up your neurons with *Science Reference Center™*, a research database with reliable information on thousands of interesting topics. Learn about earth and space sciences, energy and power, health and fitness, forensic science, life sciences, mathematics, nutrition, physics, technology, wildlife and more.

With *Science Reference Center*, you can...

- Search for reference books and articles
- Browse topics by category to get research ideas
- Limit your search results to articles that match your reading level
- Hear HTML articles read aloud with EBSCO's Text-to-Speech feature
- View science videos and animations
- Find thousands of science images, including photos, charts and graphs
- Save articles and searches to your own personal folder for later retrieval
- Enjoy quick access to science experiments, a citation tool, and helpful research guides

Ask your librarian for details.

Basic Searching on EBSCO Discovery Service (EDS)

Overview

The Search Box provides different ways of running a search. The first tab titled, “**Books, Movies, and Media**” will search the library catalog only. This includes all libraries in the system. The “**Articles**” tab searches publications and databases available. The “**local history**” tab searches resources about our local history. The “**all library resources**” tab searches both the library catalog and publications/databases.

You may search at home as a ‘guest’, but must be logged in to have **access** to full-text articles and databases, as well as access to saving and holding library items. The only feature not available at home while logged in is Ancestry.com. Log in with your library card number and last 4 digits of your phone number as your pin.

To search:

1. To get to the search box, go to www.wvls.org. The search box is in the upper right corner. It will also be available in the future on your library website.
2. Enter your search terms in the **Search** box. “Solar panels” has been entered in the Search box below.

3. Click on the drop-down menu to search by **Title**, **Author** or **Keyword**. You may search **Author** by first name/last name or by last name/first name.
4. Click Search. This will open up a new tab to the V-Cat Enhanced Catalog.

5. On the left panel will be ways to refine your results. Under “current search” is a list of your current settings. You will see what are called “Expanders”. The default here is to search within full text and to “apply equivalent subjects”, which searches related results. For example, if searching “solar panels”, “PHOTOVOLTAIC” will also be searched as it is related to the term “solar panels”. You may get rid of these by clicking on the red “x” next to each item.

6. The results show the location of each library item as well, provide real-time availability status, and provide a link to place a hold on the item.

You can further refine your results. “Articles and Library Materials” is the default search, and it finds results from wherever they are available. To see library only results, uncheck “Articles and Library Materials” and check “Library Materials”. This also where you can limit the results by **publication date**.
